BOOST

**INTELLIGENT WIRELESS HEARING BUDS  
WITH EAR ID™ AUDIOMETRIC PERSONALIZATION**

# IQbuds

BOOST

## TRANSFORMING THE POWER TO HEAR

IQbuds BOOST is the most advanced assistive listening device on the market today.

In addition to all the great features of our award-winning IQbuds; We're proud to introduce Ear ID, an App based audiometric hearing assessment that calibrates the IQbuds to your unique hearing profile, using the NAL-NL2 method.

IQbuds BOOST eases speech intelligibility with your unique hearing needs in mind.

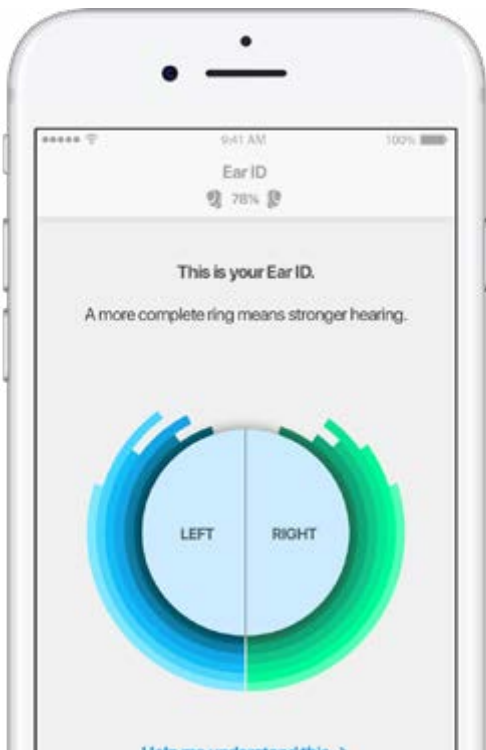

# Ear ID™

## PERSONALIZED HEARING BUDS WITH NL2 CALIBRATION

**Ear ID is an intelligent audiometric system that learns how you hear and automatically adjusts the IQbuds BOOST to your hearing profile.**

Every ear is different and everyone hears differently. Ear ID creates a unique hearing profile for you by evaluating how you hear the world and then calibrating your IQbuds BOOST for a personalized listening experience.

Ear ID is built on technology that has been independently and clinically validated as compared to conventional clinic based audiometry.

## Nuheara IQ

Our software platform has a world-class user interface and provides complete control over the powerful algorithms built into IQbuds BOOST.

- SINC Control - blend and augment
- Ear ID personalization
- Step-by-step guide to fitting
- Custom tap-touch options
- Additional usage guides and technical support
- App and firmware updates

## FEATURES

### Ear ID™

Self-fit, self-assess, auto-calibrate to your hearing profile

### Benchmark Battery Performance
